DETAILED ACTION

Drawings

1. The replacement sheet of drawings was received on 2/20/09. These drawings are not accepted because they contain new matter. The exact manner in which the support device is illustrated is not supported by the original disclosure. Specifically, the support device connecting the struts at the bridge versus away from the bridge, the support device being an elongated rectangular element versus other geometrical shapes, the support device being sandwiched between the struts and the bridge and the support device covering one of the openings in the ends of the struts and not the other, are all instances of new matter.

2. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the control unit, and support device must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure

Art Unit: 3612

is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 112

3. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

4. Claims 11-21 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention. The recitations in claims 11 and 20 of features of a support device and a control element in relation to the struts are not enabled by the original disclosure. Firstly, there is no specific manner set forth in the original disclosure as to how to

Art Unit: 3612

connect the struts by a support device AND have the support device being movable with respect to the retaining bridge. Secondly, there is no specific manner set forth in the original disclosure as to how a common control device would be structurally related so as to influence the struts. Therefore, the original disclosure fails to enable one to make and use the invention with respect to the above examples.

5. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

6. Claims 1-7, 9 and 11-21 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claims 1-7, 9, and 11-21, the recitation of "at least two" struts is not commensurate in scope with the disclosure which only supports a pair of struts.

Allowable Subject Matter

7. Claims 1-7 and 9 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action.
